## **What you should know about the SingularityNET organization**

SingularityNET is the world's leading decentralized AI platform and organization. The SingularityNET decentralized network, and the associated nonprofit SingularityNET Foundation, were founded in 2017 with an extraordinarily ambitious and important mission: To work toward beneficial Artificial General Intelligence (AGI) guided and controlled in a democratic and decentralized manner. Now in an exciting exponential growth phase, SingularityNet is launching a number of inspiring and ambitious spin-off projects planned as part of its Phase 2 whitepaper, including infrastructure, media and biomedical projects.

Global and decentralized, SingularityNET works with a team of c.a. 100 talented scientists, engineers and operational experts, working either remotely or in hubs of excellence worldwide.

At SingularityNET we value collaborative and creative ways of working, within a culture of openness and transparency where every team member is empowered to make their finest contribution and thrive. We are committed to diversity and inclusion and all candidates are welcomed and encouraged to apply irrespective of race, gender, age, religious beliefs, LGBTQ+ affiliation or any other minority characteristic.

### **Responsibilities:**

We are looking for Interns interested in learning about and working on a Decentralized environment focused on Artificial Intelligence (AI) and Cryptocurrency Market to join our ecosystem team and help us to develop our products and company.

The role will directly report to Singularity's Leadership team with direct contribution to the operational team on a day-to-day basis.

### **As a part of the role, you will:**

- Have an opportunity to practice technical and business subjects you have learned in your course.
- Learn about how to develop and manage relationships with our teams and partners.
- Provide periodic reporting to the senior management and tech leaders on the status of your deliverables and achievements and for its project tasks.
- Learn about AI and Crypto Ecosystems and communities.
- Learn about AI and Crypto Market.

- Have an understanding of the fast-changing crypto landscape.

**Knowledge in the following areas will be beneficial:**

- For Technical interns - Knowledge in Software Development and coding in a general-purpose programming language with interest in AI and Blockchain development (C/C++, Python, Mobile App development, C#, React, Front-End, Back-End, Full Stack development, DevOps, Ethereum, Solid etc)
- For Functional support areas interns - Knowledge in Business Strategy, overall Business supporting, Finance, HR, Project Management, Marketing and Marketing Strategy etc.
- Ability to showcase tech and business projects and participate in curricular and extracurricular activities.

**What you will get in return:**

- Being part of one of the greatest AI and blockchain teams in the world that aims to create beneficial Artificial General Intelligence for the good of humanity
- Understanding about multiple projects that each have the potential to change the world in domains like health, finance, media, and computing
- A lot of freedom and responsibility in organizing your work hours and location
- Opportunities to advance your career in many potential directions after the internship program
- Contract alignments in line with your course and where you are based.

**The company reserves the right to update this job description any time as per its strategy and requirements.**
