

FrontEnd Developer

Location: 100% Remote – full-time position

Project: SingularityDAO

To apply for this position please send your CV to recruitment@singularitynet.io informing the job title on the email subject line.

This is a once in a lifetime opportunity to become FrontEnd Developer at SingularityDAO.

SingularityDAO, the DeFi engine of the SingularityNET Foundation, is the first DeFi company that uses sophisticated machine learning in token markets, allowing AI to do the hard work of crypto asset management for you.

Participants can minimize risk by distributing holdings over collections of tokens called Dynasets, and earn yields by putting their assets to work. Human and advanced AI-based Digital Asset Managers will guard all holdings and optimize revenue.

What you should know about the SingularityNET organization

SingularityNET is the world's leading decentralised AI platform and organisation. The SingularityNET decentralized network, and the associated nonprofit SingularityNET Foundation, were founded in 2017 with an extraordinarily ambitious and important mission: To work toward beneficial Artificial General Intelligence (AGI) guided and controlled in a democratic and decentralized manner. Now in an exciting exponential growth phase, SingularityNet is launching a number of inspiring and ambitious spin-off projects planned as part of its Phase 2 whitepaper, including infrastructure, media and biomedical projects.

What we are looking for:

An experienced FrontEnd Developer with experience in blockchain. You need to understand how blockchain works and what it is. If this is you, this could be your dream job.

You will be developing, customizing and reporting and will present the project status and proactively consult the management on risks and opportunities. You will be working on all kinds of blockchain products like bridges, launchpad, staking pools, liquidity pools, dashboards, NFT and many other things!

In the greater SingularityDAO ecosystem, you will be working with globally distributed teams and departments including HR, Operations, Finance, Engineering and Central Management.

To fulfil this job successfully, you need to be well informed about the world of blockchain, crypto and NFT's. Any knowledge of decentralised finance is an advantage. You thrive in a fast-paced dynamic startup environment. You are comfortable working with independent experts across globally distributed teams and time zones. SingularityDAO works with Jira and Confluence and experience with these tools is favourable.

Together with the team our goal is to make DeFi accessible to everyone in an easy to use, enjoyable and secure way.

Your responsibilities will include:

- Developing and maintaining our products and making sure they are up to the highest standards in terms of usability, functionality and security.
- Be proactive in sharing thoughts and ideas on how to improve our services and add value to our users.
- Help and coach other team members.
- Being able to present your work to large groups (in digital meetings)
- Always keep up to date to the latest news and standards in blockchain and front-end development.
- Be curious, precise and have a getting things done mentality.

Requirements

To be successful in this role you will need:

- A proven track record with 5-10 years experience in the role of FrontEnd developer.
- Excellent knowledge of web3, GraphQL, JavaScript, React, next.js. Node.Js and Redux.
- Experience working in a fast-paced, complex, distributed environment, preferably a startup or scale-up organization
- Knowledge of Solidity is an advantage

- Knowledge on mobile development is an advantage.
- Knowledge or certification of Agile methodologies
- Excellent reporting and presentation skills
- Broad technical knowledge and eagerness to keep developing yourself
- Great communication skills
- Proficient in English, written and spoken
- Hands-on experience with Atlassian Confluence and Jira, and (Google) spreadsheets
- Flexibility in working hours, ability to work under pressure and adjust quickly to changing goals and timelines.

What you will get in return:

- Being part of one of the greatest DeFi, AI and blockchain teams in the world that aims to create beneficial Artificial General Intelligence for the good of humanity
- The opportunity to help build a groundbreaking AI-driven metaverse together with other world-leading experts.
- A lot of freedom and responsibility in organizing your work hours and location
- Opportunities to advance your career in many potential directions
- Salary and benefits in line with your experience and location you are based.
