

Product Owner (Platform)

100% Remote (European time zone preferred) - Full-time

To apply for this position please send your CV to recruitment@singularitynet.io informing the job title on the email subject line.

What you should know about the SingularityNET organization

SingularityNET is the world's leading decentralised AI platform and organisation. The SingularityNET decentralized network, and the associated nonprofit SingularityNET Foundation, were founded in 2017 with an extraordinarily ambitious and important mission: To work toward beneficial Artificial General Intelligence (AGI) guided and controlled in a democratic and decentralized manner. Now in an exciting exponential growth phase, SingularityNet is launching a number of inspiring and ambitious spin-off projects planned as part of its Phase 2 whitepaper, including infrastructure, media and biomedical projects.

Global and decentralised, SingularityNET works with a team of c.a. 100 talented scientists, engineers and operational experts, working either remotely or in hubs of excellence worldwide.

At SingularityNET we value collaborative and creative ways of working, within a culture of openness and transparency where every team member is empowered to make their finest contribution and thrive.

We are looking for a Product Owner to join our team and ensure the development of a product that satisfies company and users' needs to the highest standard.

Responsibilities:

You will be responsible for designing product features, prioritising development focus, estimating and requesting budget, managing product roadmap and backlog, help the development team understand the roadmap along with features to be implemented and direct the team on arrangement of task breakdown and priority.

In your role as a Product Owner you will be communicating and coordinating with the COO, POD Leader, Project Manager, Tech Leaders, the Development Team and stakeholders to make sure that product development and backlog prioritisation is focused on delivering the product in a timely and cost effective manner.

To fulfill this job successfully, working knowledge of crypto and blockchain is essential, as is a successful track record of project delivery in a fast paced environment where progress and change are dynamic. A passion for pace and commitment to on time delivery is essential, as is a collaborative approach and ability to work with multiple personalities and experts across global time zones. SingularityNet works with Jira and Confluence and experience with these tools will be favourable.

Your responsibilities will include:

Traditional PO tasks:

- Full understanding of the goal SENT aims to achieve and the gaps that must be filled and work towards
- Shape product vision into a manageable set of tasks and allocate resources towards its development
- Define high level specifications
- Create or inspect detailed functional/technical specifications
- Attend standups and be available for questions from Devs
- Working closely with the project manager and development team to ensure the correct prioritisation of product backlog
- Create product roadmap, Epics and User Stories
- Manage Epic, Story and task prioritisation
- Ensuring the development team understands the product backlog and make sure of its deliverability
- Assess value, develop cases, and prioritise stories, epics and themes to ensure work focuses on those with maximum value that are aligned with product strategy
- Manage Stakeholder communication and expectations by directly interacting with stakeholders to understand their needs and requests
- Represent the team to stakeholders
- Represent Business and Stakeholders to the the development team
- Make decisions on when to release a product or a feature
- Accept/Reject Development team's work

Product Marketing tasks:

- Create Content/documentation for web and other media
- Engage with our target audience to identify main bottlenecks and solutions
- Be a platform evangelist

Requirements

- A proven track record with 3+ years experience in the role of Product Owner
- Degree in Computer Science or equivalent
- Project management / Product owner certification
- Background in development preferable
- Experience with Blockchain is highly desirable
- Good working knowledge / experience with Atlassian Jira/Confluence, GitLab or other issue management;
- Outstanding communication, facilitation, negotiation, and coaching skills;
- Experience with Agile methodologies, understanding Agile values and principles; knowledge of an agile framework or method (i.e. Scrum, Kanban), or understanding of software development life cycle models as well as in-depth knowledge of traditional project management principles and practices
- Good working knowledge or experience at refinement, story splitting, estimation, velocity, and retrospection;
- Skills required for planning and problem solving with product management and delivery teams
- Experience with working in a fast paced, complex, distributed environment, preferably a startup or scale-up organisation
- Experience leading cross-functional teams to deliver projects with multiple dependencies and constraints
- Excellent reporting and presentation skills
- Broad technical knowledge and eagerness to keep developing yourself
- Flexibility in working hours, ability to work under pressure and adjust quickly to changing goals and timelines.

What you will get in return:

- Being part of one of the greatest AI and blockchain teams in the world that aims to create beneficial Artificial General Intelligence for the good of humanity
- Working on multiple projects that each have the potential to change the world in domains like health, finance, media, and computing
- A lot of freedom and responsibility in organising your work hours and location
- Opportunities to advance your career in many potential directions
- Salary and benefits in line with your experience and location
