Position: UX/UI Designer

Location: 100% Remote

Project: Mindplex

To apply for this position please send your CV to recruitment@singularitynet.io informing the job title on the email subject line.

We are looking for a UX/UI Designer to join our Mindplex project, it is a multimedia content site powered by fully decentralized matchmaking between content creators and content consumers.

What you should know about the SingularityNET organization
SingularityNET is the world's leading decentralized AI platform and organization. The SingularityNET decentralized network, and the associated nonprofit SingularityNET Foundation, were founded in 2017 with an extraordinarily ambitious and important mission: To work toward beneficial Artificial General Intelligence (AGI) guided and controlled in a democratic and decentralized manner. Now in an exciting exponential growth phase, SingularityNet is launching a number of inspiring and ambitious spin-off projects planned as part of its Phase 2 whitepaper, including infrastructure, media and biomedical projects.

Global and decentralized, SingularityNET works with a team of c.a. 110 talented scientists, engineers and operational experts, working either remotely or in hubs of excellence worldwide. At SingularityNET we value collaborative and creative ways of working, within a culture of openness and transparency where every team member is empowered to make their finest contribution and thrive.

What we are looking for:

SingularityNET is looking for an outstanding User Experience Designer to design the future of decentralized media experience. The UX Designer will be responsible for researching, designing, innovating, and prototyping new user experiences that pave the way for the future of the Mindplex media platform in a way that has never been done before. The candidate will collaborate with product owners, other designers, content strategists, developers and business partners. Candidates should possess exceptional design skills, creative problem solving, a great sense of aesthetics, as well as user-centered design principles. The applicant must have an affinity for minimal design, typography, and attention to the smallest of details. A strong ability to distill complex problems into simple, elegant solutions is key to success at SingularityNET. We are a fast-paced company with a pioneer spirit, so the majority of the work will be focused on innovating original and creative content and application, as well as final deliverables and solutions that work in the real world.

Your responsibilities will include:

- Research and define UX strategy for consumer segments and different customer types building upon and scaling Mindplex offerings
- Imagine, conceive of, manage, and drive ownership UX design projects from defining customer problems or opportunities to concept to implementation
- Develop creative and innovative design solutions that support multiple types of users in different types of roles with varying scope and objectives
- Define and implement creative solutions that help improve comprehension and clarity of options and decisions
- Constantly measure how designs are performing for target customers. Iterate and improve those experiences as needed. Influences team roadmaps to include experience improvements when the design or product is not performing or needs improvement.
- Invest in building relationships and trust with stakeholders, peers and working groups.
- Determines best UX solutions based on customer feedback and business goals and helps to determine overall direction, identifying challenges and adapting as needed based on the context of the solution and customer.
- Foster the defining and sharing of UX design patterns and standards, artifact reuse and consistency across team members. Contribute to the SingularityNET Design System.

Requirements

To be successful in this role you will need:

- 2+ years' work experience advocating for, creating and building and world-class experiences for web and mobile digital devices. Knowledge of global design best practices and working for international companies a plus.
- An excellent portfolio showcasing UI/UX and visual design work with a strong design sensibility and articulate storytelling. Evidence of exceptional design ability is a must
- Must be proficient and highly skilled in Photoshop, Illustrator, Sketch, Figma and other design tools
- Ability to prototype in UX prototyping tools such Invision. With HTML or WordPress skills is a plus.
- Understanding of front-end web and mobile technologies such as CSS/HTML and general understanding of back-end technologies that are required to build out experiences. Partnering well with technology is a must.
- Ability to perform in a fast paced, high stress iterative design process under minimal supervision
- Persona-focused, with experience using design research methods to uncover user insights. Are able to take those insights and define the desired user outcomes.

SingularityNET

- Evidence of solving large scale problems for customers. Ability to take complex concepts and simplify them for the customer in the form or elegant experiences.
- Excellent command of user experience, design principles, problem framing skills, and beautiful visual design skills
- Proficient English written and verbal communication skills. Strong ability to communicate design concept ideas through sketches, prototypes and wireframes. Experienced and comfortable with presenting work to executives and large groups. Strong ability to communicate complicated concepts and bring clarity to stakeholders and team members.
- Self-motivated, able to work independently but also collaborative and driven by group critique. Proven track record as an expert in design who can collaborate well with other functions.

Qualifications/Degrees:
- Bachelors or master's degree in the study of design including one of the following; Design, Web Design, Interaction Design, UI/UX Design, Service Design, Information Architecture, HCI, Human Factors, or a portfolio that shows equivalent project experience.

What you will get in return:
- Being part of one of the greatest AI and blockchain teams in the world that aims to create beneficial Artificial General Intelligence for the good of humanity
- The opportunity to help build a groundbreaking AI-driven metaverse together with other world-leading experts.
- A lot of freedom and responsibility in organizing your work hours and location
- Opportunities to advance your career in many potential directions
- Salary and benefits in line with your experience and location
